

## ABOUT ME

I am a kind of person made of 60% Coffee and 40% Gadgets. I can speak fluent Lorem Ipsum and I bleed Pantone 032 C. I dream in CMYK and I am rubbish at maths. I have an irrational fear of *comic sans* and everytime someone *stretches* a font, I die.

Moreover, working as a freelance graphic designer since 2011, I have gained a lot of experience not only in design process but also in project management and team work.

Simple and Functional Design is what I believe in. I love admiring things and believe in keen observations. Every single visual I come across, I make it serve as an inspiration for my future designs.

## MAJOR PROJECTS

### Sonder : Music Streaming Application

Sonder is a (concept) music application based on blend of music and social media. Having some ingenious features like 'Live Connect' makes this application one of it's kind.

### Clouds : College Mobile Application

Clouds is a (concept) application designed for NIFT, which is meant to provide academic information to students in a intuitive format as well as college news on a daily basis.

### Pinjrakari : A Craft Research Report

This project was an initiative to bring into light the dying craft sector of India. Under the banner of NIFT & Ministry of Textiles, this project was carried out for the craftsmen of Pinjrakari craft of Kashmir.
